

safe-T-seat Strap Assembly Instructions

1. Cut the old crotch strap and remove from seat.
2. Insert the new strap into the seat slot making sure that the T-stitch goes all the way through the seat slot and is unable to be pulled back through the slot.
3. Remove 1 of the jam lever buckles from the shoulder straps and insert through the backrest slot of the seat. Using the other jam lever buckle as a guide, thread the strap through the buckle and push down the lever to lock the strap.
4. Set the seat on a carpet or rug and have your child sit in the seat. Adjust the shoulder straps and crotch strap lengths so that the Y buckle is on the child's chest.

5. Enjoy the ride!
